Office Action Summary	Application No. 10/659,297	Applicant(s) SUZUKI ET AL.	
	Examiner Pedro Philogene	Art Unit 3733	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period **will** apply and **will** expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply **will**, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Allowable Subject Matter

The indicated allowability of claim 3 is withdrawn in view of the newly discovered reference(s) to Lavender (6,016,592). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Burgess et al. (20030114853) in view of Lavender (6,016,592).

With respect to claim 3, Burgess et al disclose a rod connector (66) comprising a connector main body (76) swingably attached to a shank (68), the connector main body comprising a recess configured to engage part of a spherical end portion (72) of the shank, part of the spherical end portion extending outside of the recess in a direction towards the shank; as best seen in FIG.5 a rod supporting portion, as best seen in FIG.5, provided in the connector main body and configured for supporting a rod (12); as best seen in the FIGURES; and a pressure fixing device (34) for pressure fixing the rod to the rod supporting portion of the connector main body; as best seen in the FIGS.

It is noted that Burgess did not teach of a each convex portion comprising a sharp distal end, as claimed by applicant. However, in a similar art, Lavender provides

Art Unit: 3733

the evidence of the use of each convex portion comprising a sharp edges (122) adjacent the recess 114-120) to bite into and firmly grip the pipes or rods.

Therefore, give the teaching of Lavender, it would have been obvious to one having ordinary skill in the art, at the time the invention was made to modify the convex portion by adding a sharp distal end in the device of Burgess, as taught by Lavender, to bite into and firmly grip the rods.

Response to Arguments

Applicant's arguments with respect to claim 3 have been considered but are moot in view of the new ground(s) of rejection. An update search reveals the reference to Lavender which teaches of a sharp convex recess portion to bite into a pipe or rod.

Conclusion

A shortened statutory period for reply to this action is set to expire THREE MONTHS from the mailing date of this action.
